

WELCOME TO OUR NEW
HEADQUARTERS

ONiA, South Australia's largest orthodontic network, has moved into stunning new headquarters in the heart of the Adelaide CBD and cultural precinct on North Terrace.

Conveniently located in the heart of the city on the 3rd Floor of Bagot House at 198 North Terrace (disabled access is available), our state-of-the-art practice provides the very best in orthodontic care, and our facilities and services are unmatched anywhere in Adelaide.

Our patient facilities have been designed to make the experience of visiting our practice a pleasant and enjoyable one.

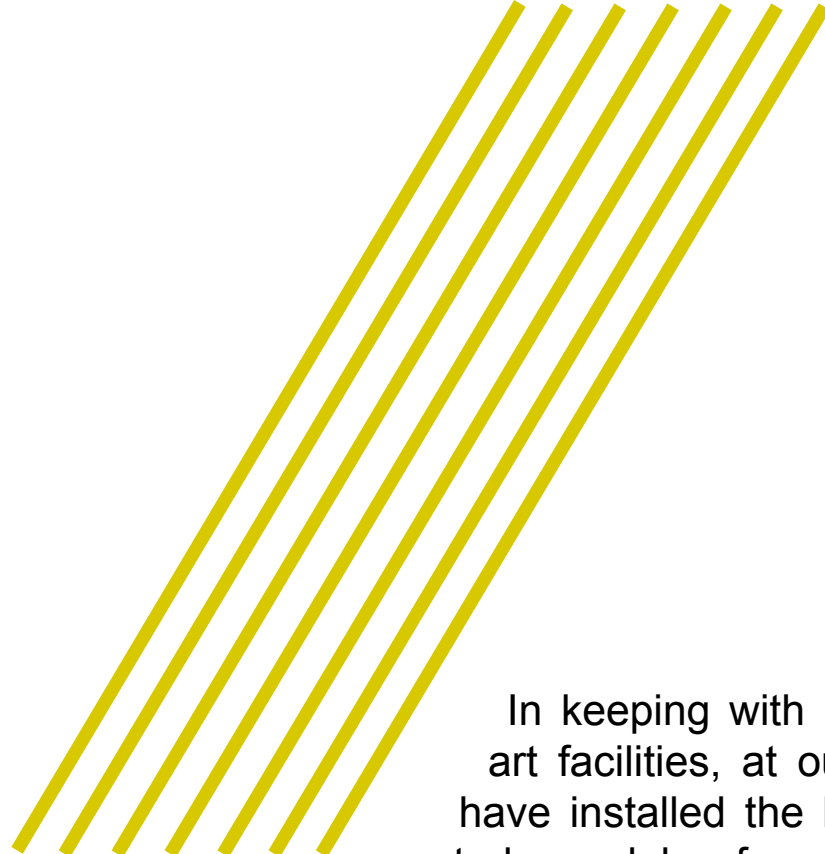

The practice consists of two consultation rooms and four surgeries, all purpose-built to our specific requirements and to meet the needs of our patients.

Our waiting room overlooks North Terrace, the heart of the Adelaide cultural precinct, providing outstanding views of such landmarks as the South Australian Museum, Art Gallery of South Australia, the War Memorial and the University of Adelaide.

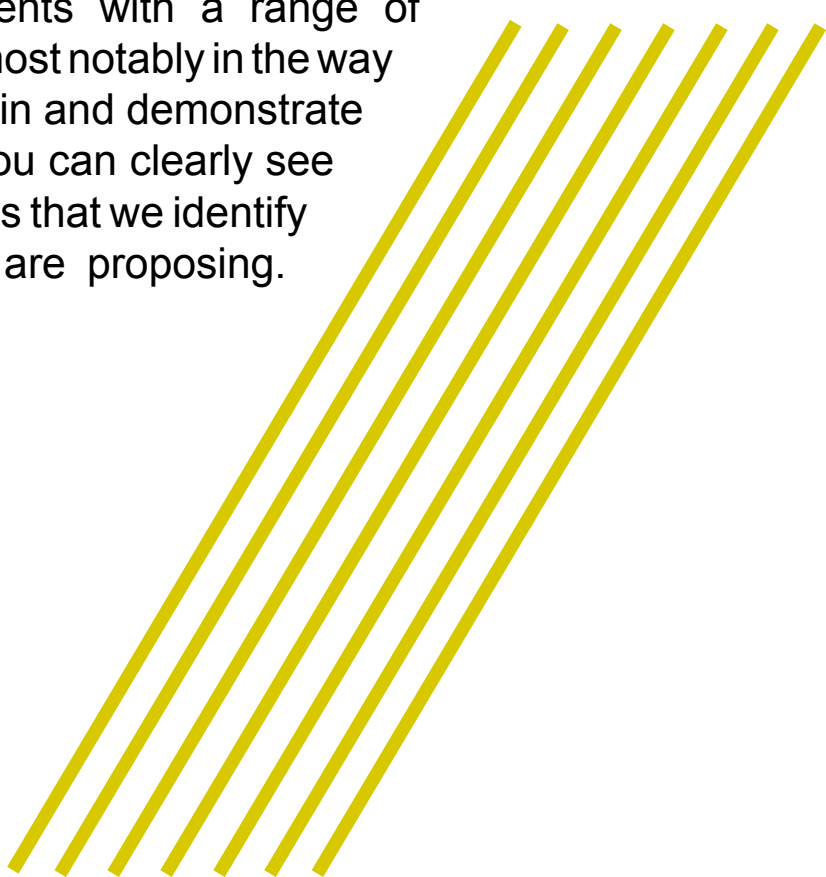

In keeping with best practice and our state-of-the-art facilities, at our North Terrace headquarters we have installed the latest 3D laser scanners to create study models of our patients' jaws and teeth. These produce high resolution and extremely detailed scans that create virtual study models that have eliminated the need for cumbersome plaster models.

This enables us to work more quickly and efficiently, and allows us to integrate 2D x-rays with 3D virtual models, meaning that we are able to predict the end-effect of extractions and tooth movements.

This system provides our patients with a range of extremely useful benefits as well, most notably in the way in which we are better able to explain and demonstrate the effects of our work to you, as you can clearly see on our 3D study models the problems that we identify and the orthodontic solutions we are proposing.

Our dedication to the highest levels of patient care also extends to the management of our practice and the way we communicate with you.

We have now become a fully paperless practice through the implementation of the TOPSOortho information management system, designed specifically to facilitate the work of orthodontic practices, and which has streamlined our booking, billing and information services.

As an extensive orthodontic network with practices across South Australia, the swift and

efficient transfer of information is crucial to our work, and now we are able centrally to access our patients' files and notes from any of our practices throughout the state. This means that if you are a patient at one of ONiA's regional practices, but are in Adelaide and require treatment, then orthodontists in our headquarters can access your details with ease.

Our high-quality information management systems also means that we are able to accept and process payments using a variety of methods, meaning it is easier and more convenient for you to manage the payments for your treatment.

For instance, we are able to offer our patients payment plans, where regular direct debit instalments can be taken via a bank transfer or from a credit card. In addition, our payments and billing system issues electronic statements and receipts for your ease and convenience, and reducing the need for paper waste.

Getting To Us

Being located in the heart of the Adelaide CBD means that there are many public transport options available for you to reach us.

Trains and trams

We are located:

500m from the Adelaide Railway Station

450m from the Adelaide Railway Station tram stop

350m from the Rundle Mall tram stop

Buses

Bus stop T2 is right outside our headquarters on the south side of North Terrace, while bus stop F2 on the north side is only 90m away. The following bus routes are serviced by these stops:

Why Choose ONiA?

We have a resident staff of highly-qualified and skilled specialist orthodontists, all of whom are full members of the Australian Dental Association and the Australian Society of Orthodontists.

The training and expertise of our team means that we are able to provide patients with a complete range of orthodontic services, and the extensive experience of our orthodontists means that you are always in safe and capable hands

Our practice and administration staff are also highly experienced, most having been with us for many years.

They know how to care for you and your family and are experts at taking care of patients' needs.
